

SCORING YOUR TESTS

To score your tests, first use the answer key to mark each of your responses right or wrong. Then, calculate your **raw score** for each section by counting up the number of correct responses. Use the table below to help you calculate your scores:

Raw Score	
Section	# of Questions Correct
1. Reading	_____
2. Writing	_____
3. Math: No-Calculator	_____
4. Math: Calculator	_____
Raw Score for Reading (Section 1): _____	
Raw Score for Writing (Section 2): _____	
Raw Score for Math (Section 3 + 4): _____	

SCALED SCORES

Once you have found your raw score for each section, convert it into an approximate **scaled test score** using the following charts. To find a scaled test score for each section, find the row in the Raw Score column that corresponds to your raw score for that section, and then check the column for the section you are scoring in the same row. For example, if you had a raw score of 39 for reading, then your scaled reading test score would be 35. Keep in mind that these scaled scores are estimates only. Your actual SAT score will be scaled against the scores of all other high school students taking the test on your test date.
